Providing digital transformation and business process automation services for SME's at affordable rates.

TARGET AUDIENCE

Telecommunication, IT Services, Construction and Event services

PROCESS OVERVIEW

The management consultancy firm aims to provide business process automation and digital transformation solutions to the small businesses keeping which SMEs can afford.

We have been working together for 10 months now and the client has never compromised on providing a clear outlook and up to date information about his business and his expectations from the running campaign.

The client and our team coordinated well during this time. Moreover, the client was available to answer the questions throughout this process. Due to this collaborative effort, we have been running the campaign successfully and generating quality leads for the client.
